The first thing you will want to do is cut your Wisper White Cardstock in half so that it measures 5 ½ by 8 ½ inches. You can do this with the Stampin Trimmer or a pair of scissors. Then score at 4 1/4" and fold your card. Set aside.

Cut the rest of the paper pieces. The Stampin Trimmer is a great tool to both cut and score with! You just have to be careful not to use the cutting blade when scoring.

Use your Happy Birthday stamp or any other sentiment that you may want to use and with the Memento Tuxedo Black ink stamp the sentiment on the Mint Macaron piece of cardstock. After that adhere the Mint Macaron strip to the small piece of basic black cardstock being careful to center so that you have an even border on the top and bottom.

Now adhere the Sentiment Strip to the Share What You Love DSP, being careful to center from top to bottom. Next adhere this piece to the basic black cardstock.

At this point stamp the inside of your card with a sentiment of your choosing or stamp with a flower or both before adhering the panel for the front of your card.

The reason for this is that if you should smear the ink or not get good coverage you can always get another piece of Wisper White cardstock and make another base without losing all the work you did putting together the front of the card.

Now you can loop your mini-sequins and with mini glue dots adhere to the mint macaron just beside the sentiment. Follow by making your bow out of the tulle and placing on top of the sequins with mini-glue dots.
