Using the Punch Board punch and score on 3 sides. Punch at 2" and at 4" on each side.

On the fourth side just punch at 2" and 4" do not score.

Cut off the tab on the fourth side that is not scored. Refer to my video if you need to. It is much easier to see where to cut.

You will also need to cut up to the score line on each side of the bottom of box - see picture

Fold and burnish on score lines

Refer to my video to see how to fold in the flaps to form the box. In this case a picture is worth a thousand words.
